### **DETAILED ACTION**

# Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lockhart et al (Nature Biotechnology vol. 14 pp. l 1675-1680 1996).

Lockhart et al teach a method of displaying results In which a plurality of probe biopolymers immobilized on a biochip are hybridized to a sample biopolymer comprising step of displaying information obtained in hybridization experiment about a hybridization level for each probe with similarity score representing similarity of base sequences. (see whole document teaching arrays with measuring level of hybridization signal (see figure 3 and 5 and they teach phycoerythrin and fluorescein emissions in experimental protocol).

The term "hybridization level" and "similarity score" reads broadly to cover Lockhart et al's teaching of hybridization intensities.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Schena et al (Science vol. 270 pp. 467-470 1995)

Schena al teach a method of displaying results In which a plurality of probe biopolymers immobilized on a biochip are hybridized to a sample biopolymer comprising step of displaying

Application/Control Number: 09/808,407

Art Unit: 1637

information obtained in hybridization experiment about a hybridization level for each probe with similarity score representing similarity of base sequences. (see whole document 1 and they teach fluorescein emissions on page 468). They also teach showing the display of plurality of biochips (see figure 1).

The term "hybridization level" and "similarity score" reads broadly to cover Schena et al's teaching of hybridization intensities.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Slater et al (US 6,448,387 Sept, 10,2002).

Slater al teach a method of displaying results In which a plurality of probe biopolymers immobilized on a biochip are hybridized to a sample biopolymer comprising step of displaying information obtained in hybridization experiment about a hybridization level for each probe with similarity score representing similarity of base sequences. (See whole document teaching arrays with measuring level of hybridization signal of different dyes). They also teach showing the display of plurality of biochips(see figure 1).

The term "hybridization level" and "similarity score" reads broadly to cover Slater et al's teaching of hybridization intensities.

#### **SUMMARY**

4. No claims allowed.

## **CONCLUSION**

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Siew whose telephone number is (703) 305-3886 and whose e-mail address is Jeffrey.Siew@uspto.gov. However, the office cannot guarantee security through the e-mail system nor should official papers be transmitted through this route. The examiner is on flex-time schedule and can best be reached on weekdays from 6:30 a.m. to 3 p.m. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Gary Benzion, can be reached on (703)-308-1119.

Any inquiry of a general nature, matching or filed papers or relating to the status of this application or proceeding should be directed to the <u>Tracey Johnson</u> for Art Unit 1637 whose telephone number is (703)-305-2982.
